

**Companies typically spend 60 percent of their total annual budget for services—either for staff augmentation or for project and business services.**

The latter, known as managed tasks, represent the majority of procured services and include mission-critical projects such as outage services, maintenance, construction and many others.

With managed task services comes an assortment of issues. The most common are budget overruns, unscheduled project delays, inconsistent contract compliance, inaccurate project reporting and accounting lags. Now you can better address these issues in a more timely, cost-effective manner.

## ACCUTRACK PUTS YOU IN CONTROL:

Now you can take a consistent approach to real-time budgeting, workforce balancing and regulatory compliance when managing internal and contracted resources in your organization. AccuTrack combines deep supply chain expertise with an automated cost-tracking technology that is specifically tailored to meet your needs.

Beginning of Shift

End of Shift

## KEY BENEFITS INCLUDE:

- Single point of entry for all labor hours, materials and costs
- Anytime, anywhere access from any Internet-enabled device
- Real-time visibility of all outage tasks, with task summaries ranked according to risk
- Immediate verification and costing based on contracted rates and terms
- Dynamic reporting at every level of your organization
- Automated approval process that accommodates your approval workflow

## DISTINCT VALUE TO YOU:

**AccuTrack is a Web-based technology solution that helps energy and utility companies better manage costs of project-based labor, equipment and materials.**

- Applies contracted rates and costs to all project data for real-time visibility into managed tasks
- Reduces project budgets by decreasing overcharges, eliminating duplicate payments and enforcing contract compliance
- Integrates with your existing ERP/EAM systems, scheduling applications and project management software
- Minimizes post-project audit costs
- Routes approved payment requests to buyer's accounts payable system automatically, for efficient, paperless invoice processing
