

pantellos buyer

A fast, simple solution to improve your purchasing process

Are you looking for an easy, cost-effective way to improve your supply chain process? Would you like to save money on routine transactions? Do you need better and more accessible information about procurement expenditures? Are you trying to achieve more control over off-contract purchasing?

Now you can do all this and more-without a major investment in e-procurement technology. The solution is Pantellos Buyer, a simple and powerful tool that saves money, streamlines transactions and provides high-quality expenditure data while helping you control maverick spending.

What does Pantellos Buyer do?

Pantellos Buyer automates routine purchasing tasks by providing an efficient, easy-to-use desktop buying application. Users throughout your organization can use Buyer for everyday procurement tasks such as:

- Searching multi-supplier electronic catalogs for products and services
- Comparing prices to find the best-priced item
- Creating requisitions
- Obtaining approval for purchases
- Generating and submitting purchase orders
- Submitting change requests
- Checking the status of orders

By empowering users to handle routine transactions, you can free up procurement professionals for work that creates greater value for the business. At the same time, Buyer increases transaction efficiency and provides built-in controls to reduce off-contract spending.

What can you expect?

Quite simply, you can expect to save time, save money, improve control of expenditures and increase the visibility of your procurement spending. Buyer offers you the efficiency, high-quality data and purchasing controls integral to achieving supply chain excellence.

Several Pantellos trading parties have already adopted Buyer and are enjoying transactions savings, flexibility and ROI.

fast facts

- Provides an efficient, automated purchasing application without a major investment in technology and infrastructure
- Streamlines day-to-day purchasing tasks such as shopping, requisitioning, approval, purchase orders and change order requests

- Allows users across the organization to perform routine transactions while controlling off-contract spending
- Improves the accuracy and visibility of expenditure data
- Allows online searching of multiple supplier catalogs via the Pantellos-hosted BugsEye® catalog engine powered by Requisite Technology®
- Allows users to view, receive and store advanced shipping information from suppliers
- Provides an enhanced process for tracking order status
- Includes assessment of your purchasing process, custom software configuration for your organization, and system testing and implementation support by a team of Pantellos experts
- Provides access to the Pantellos Marketplace, including a comprehensive suite of supply chain solutions and services and compelling pricing and terms available through Pantellos Collaborative Agreements (PCAs)

features

- **Advanced ship notice (ASN):**
Allows suppliers to send shipping information to buyers, enabling buyers to receive, store and view ASN information, as well as view all purchase order shipping information.
- **Order status process:**
Displays the real-time status of requisitions and purchase orders.
- **Online catalogs:**
Enables catalog searching and sorting by price, description, relevance, manufacturer, part number or supplier part number; and allows grouping results into smaller categories for faster item identification.
- **Round-trip catalog requests:**
Makes existing Web-based supplier catalogs accessible from within Pantellos Buyer; goods and services can be added to the Buyer shopping cart for purchase.
- **Change order request:**
Supports purchase order changes and cancellations after a P.O. has been sent to a supplier but before the order has been completely shipped.

powerful partner

Pantellos Buyer is powered by Commerce One and Requisite Technology.
